COMPANY PROFILE - 2026

WHO WE ARE

Frontline is a full-service digital solutions agency built for brands that want to show up, louder, and more consistent than everyone else in their feed. We bring graphic design, social media management, digital marketing, branding, videography, photography and post-production together under one roof - so our client get one team, one vision, and one point of contact for everything creative.

Led by Kusan Nirash, Frontline was started with a simple idea: every brand, regardless of size, deserves a front-line team treats their business like its own. that belief still shapes how we work with every client today - hands on, deadline driven, and obsessed with getting the details right.
